Declarations of conformity

REACH

We hereby confirm that the FOAMplus® PUR Systems (Isocyanates + Polyols) supplied by Storopack are compliant with EC Regulation 1907/2006 (REACH).

Article 33(1) of REACH obliges suppliers of products to inform their downstream customers of the presence in the products of Substances of Very High Concern (SVHC) included in the "candidate list for authorization" above a concentration of 0,1% weight by weight.

The candidate list can be consulted at the following address:
http://echa.europa.eu/candidate-list-table

Based on the information we received from our upstream suppliers, none of these substances is present in one of our products supplied to you.

Every six months new substances are added to the candidate list. If it appears that one of the products we supply to you contains one or more of the mentioned SVHC, we will inform you and take the necessary actions to remove these substances.

The FOAMplus® Isocyanate components contain more than 0,1% monomeric MDI and are subject to restriction as listed in annex XVII of the regulation.

EU RoHS

We hereby confirm that the FOAMplus® PUR Systems (Isocyanates + Polyols) supplied by Storopack are compliant with EU directives 2002/95 (RoHS), 2011/65 (RoHS 2) and 2015/863 (RoHS 3)

Dangerous substances as listed in the directive, i.e. : lead, mercury, cadmium, hexavalent chromium, polybrominated biphenils (PBB), polybrominated diphenyls ethers (PBDE), Bis(2-ethylhexyl) phthalate (DEHP), Benzyl butyl phthalate (BBP), Dibutyl phthalate (DBP), and Diisobutyl phthalate (DIBP) are not contained or are below the threshold values.

Heavy Metals

We hereby confirm that in the FOAMplus® PUR Systems (Isocyanates + Polyols) supplied by Storopack, the heavy metals Pb, Cd, Hg and Cr VI are not contained or their sum is below the 100mg/kg limit.

PFAS, PFOA, PFOS

We hereby confirm that the FOAMplus® PUR Systems (Isocyanates + Polyols) supplied by Storopack do not contain intentionally added PFAS (poly and perfluoroalkyl substances), PFOA (perfluorooctanoic acid) and PFOS (perfluoro octane sulfonic acid).

PFAS REPORTING UNDER TSCA

The United States Toxic Substances Control Act (TSCA) is a federal regulation that allows the Environmental Protection Agency (EPA) to comprehensively manage chemicals in U.S. Commerce. This includes reporting requirements under TSCA Section 8(a)(7), which apply to perfluoroalkyl and polyfluoroalkyl substances (PFAS). TSCA mandates the reporting of certain information from U.S. manufacturers of all PFAS chemicals, including PFAS created as manufacturing byproducts. Reporting is also required for PFAS imported into the United States, whether on their own or as an incorporated article component.

PFAS are a large and complex group of chemicals; TSCA PFAS requirements apply to all types of PFAS used in U.S. commerce, as defined by the EPA's Chemical Data Reporting (CDR) database. More information is available from the EPA's TSCA PFAS webpage.

We hereby confirm that the FOAMplus® PUR Systems (Isocyanates + Polyols) supplied to you dot contain any of the five restricted PBT substances.

DECLARATION OF TSCA COMPLIANCE: PBT RESTRICTIONS

On January 6, 2021, the U.S. Environmental Protection Agency (EPA) published final rules under Toxic Substances Control Act (TSCA) Section 6(h) to restrict the importation and use of five persistent, bioaccumulative, and toxic (PBT) chemicals. These substances are:

PIP (3:1), phenol, isopropylated phosphate (3:1), CAS 68937-41-7
DecaBDE, decabromodiphenyl ether, CAS 1163-19-5
2,4,6 TTBP, 2,4,6-tris(tert-butyl)phenol, CAS 732-26-3
HCBD, hexachlorobutadiene, CAS 87-68-3,
PCTP, pentachlorothiophenol, CAS 133-49-3

We hereby confirm that the FOAMplus® PUR Systems (Isocyanates + Polyols) supplied by Storopack do not contain any of the reportable substances.

Persistent organic pollutants (POPs)

We hereby confirm that the FOAMplus® PUR Systems (Isocyanates + Polyols) supplied to you do not contain any persistent organic pollutants as listed on the ECHA website.

Dodd-Frank

We hereby confirm that the FOAMplus® PUR Systems (Isocyanates + Polyols) supplied to you are compliant with the "H.R. 4173 Dodd-Frank Wall Street Reform and Consumer Protection Act" Section 1502 on Conflict Minerals".

Sec. 1502) *Expresses the sense of Congress that the exploitation and trade of conflict minerals originating in the Democratic Republic of the Congo (DRC) helps finance conflict characterized by extreme levels of violence in the eastern DRC , particularly sexual- and gender-based violence, and contributes to an emergency humanitarian situation therein, warranting certain disclosures under the Securities Exchange Act of 1934.*
Amends the Securities Exchange Act of 1934 to direct the SEC to issue regulations requiring persons for which conflict minerals are necessary to the functionality or production of a product manufactured by that person to make annual disclosures of whether any such conflict minerals originated in the DRC or an adjoining country. Requires the report, regarding any minerals that did originate in the DRC or an adjoining country, to describe: (1) due diligence measures taken on the source and chain of custody of such minerals; and (2) the products manufactured, or contracted to be manufactured, that are not DRC conflict free. Defines "DRC conflict free" as products that do not contain minerals that directly or indirectly finance or benefit armed groups in the DRC or an adjoining country.
Instructs the Secretary of State to: (1) submit to Congress a strategy to address the linkages between human rights abuses, armed groups, mining of conflict minerals, and commercial products; (2) produce and update periodically a map of mineral-rich zones, trade routes, and areas under the control of armed groups in the DRC and adjoining countries ("Conflict Minerals Map"); and (3) publish in the Federal Register a notice of intent to declare a mineral a conflict mineral.
Directs the Comptroller General to assess: (1) the rate of sexual- and gender-based violence in war-torn areas of the DRC and adjoining countries; and (2) the effectiveness of these newly required reports in promoting peace and security in such countries. Requires the Secretary of Commerce to assess the accuracy of independent private sector audits and other due diligence processes.

For the manufacture of the product we do not intentionally introduce any tin, tungsten, gold or tantalum, termed as "Conflict Minerals", and we do not intentionally introduce any "Extended Minerals"; these are not necessary to the functionality or production of the products. Therefore, these Conflict Minerals and Extended Minerals are not expected to be present in the products and we do not analyse for them, or as the case may be, they would only be present as technically unavoidable impurities.

Metzingen, 04/06/2026
